

Alice Miller School Student Welfare

Record of student medical conditions

A record of student medical conditions will be maintained on the SAS2000 database, and also CareMonkey.

CareMonkey is an innovative, user-controlled solution that automates gathering medical information and emergency from parents/carers. This information is instantly available to authorised carers such as supervisors and teachers via smart-phones and tablets.

The process of collecting the information is automated. Parents receive frequent prompts from CareMonkey reminding them to update information about students.

Revised November 2017

Next revision: November 2019

Checked and altered/edited January 21 2019
